An Exposure Visit to ICAR–IIRR and Agribiotech Foundation was organized on March, 16, 2019 for tribal farm women from Deverakonda, Nalgonda under the DST sponsored project, Technological Empowerment of farm women through good agricultural practices. The Director, ICAR-IIRR, Dr.S.R Voleti addressed the farm women and encouraged them to keenly observe the various research activities on the IIRR farm during their visit and adopt the suitable varieties, management practices on their farms to enhance the yield and thereby income of their families. The mechanical transplanter was a big attraction for the farm women who posed several questions to Dr. T. Vidhan Singh on the labor saving, ease in operation and cost of the machinery on display at IIRR. Dr. V Jhansilakshmi apprised the participants about identification of symptoms of pest and disease attack and the appropriate control measures.

An Eco-entrepreneurship Training on production of selected biopesticides was provided by Dr. V. Sandhya, Co-PI of the project at Agribiotech Foundation, Rajendranagar. Hands-on-training to the tribal farm women on production of *trichoderma* was provided. The step by step procedure was practically demonstrated and the participants were motivated to start a small scale enterprise for production of biopesticides with technical support of Agribiotech Foundation, Rajendranagar. Dr. B. Jhansi Rani, Co-PI of the project, demonstrated the use and preparation of botanicals as eco-friendly control measures from locally available plant materials. The program was coordinated by Dr. Amtul Waris, PI of the DST sponsored project with active support of project personnel, N. Sunder Rao, B. Jangiaiah and T. Srikant.
