

DIVISIONS/UNITS

Major Research Programmes are:

Crop Improvement- Genetics & Plant Breeding, Hybrid Rice, Biotechnology Statistics and Nation

- Genetic Enhancement of Yield and stress tolerance(GEY)
- Genetic Enhancement of quality for domestic and export purpose(GEQ)
- Application of biotechnology tools for rice improvement(ABR)

Crop Production-Agronomy, Physiology, Soil Science, Engineering and Computer Applications

- Enhancing Resource and Input use Efficiency (RUE)
- Sustaining Rice System Productivity (SSP)
- Assessing and managing crop response to climate change (CCR)

Crop Protection - Entomology and Pathology

- Host-plant resistance against insect pests and its management (HRI)
- Host-plant resistance against pathogens and its management (HRP)
- Integrated Pest Management (IPM)

□ Transfer of Technology - Communication and Training Centre (CTC)□ and Economics

- Training, Transfer of technology and impact analysis (TTI)

Other□ Programs
