

## ICAR-IIRR participates in India AI impact Summit 2026

ICAR-Indian Institute of Rice Research participates in INDIA-AI impact Summit 2026, a flagship event with three sutras (People, Planet, Progress) shaping a sustainable AI future. These Sutras define how AI can be harnessed through multilateral cooperation for collective benefit. The Seven Chakras translate the guiding Sutras into concrete areas of multilateral action. These themes include spanning human capital, inclusion, trust, resilience, science, resources, and social good to channel global collaboration towards measurable outcomes.

Our scientists Drs. B. Sailaja, Ch. Padmavathi, N. Somasekhar, R. Gobinath and K.V. Raghavendra participated in the Agri-AI panel discussions organized by ICAR and other leading institutes during the India AI Impact Summit 2026. AI is enabling smarter, data-driven farming practices to enhance productivity and farmer incomes. The discussions focused on AI-driven solutions for pest and disease diagnosis, weather sensor-based advisories, and Carbon Sequestration for agriculture. They actively engaged in meaningful interactions on collaboration, research partnerships, and networking opportunities. Additionally, they gained valuable exposure by participating in the India AI Impact Expo 2026, a large-scale exhibition held alongside the Summit, which showcased real-world AI technologies and applications across multiple sectors, emphasizing innovation, adoption, collaboration, and measurable impact.
