

# DRRH6 (IET 28123)

## High Yielding Rice Hybrid

A rice hybrid suitable for irrigated early ecology with high yield. It has medium slender grain with acceptable quality traits along with high HRR.

|                  |   |                                                                                                             |
|------------------|---|-------------------------------------------------------------------------------------------------------------|
| Ecology          | : | Irrigated Early                                                                                             |
| Grain Type       | : | Medium Slender                                                                                              |
| Duration         | : | 115-120 days                                                                                                |
| Yield            | : | 6.5 t/ha                                                                                                    |
| Salient features | : | Resistance to stem borer and leaf folder. Moderate resistance to neck blast, leaf blast, BLB and false smut |
